

## Steiger Newsletter January 2018

The Stitch Lab has already welcomed several customers interested in the innovation developed by Steiger. They have also brought projects and samples to be produced on the machines available for demonstration. The Taurus 2.170 XP able to knit 3D knitwear is the highlight of the Stitch Lab. On its side, the Antares 3.130 knits complex intarsia pullovers and the medical version of the Libra 3.130 knits orthopedic products.

The nearby training room equipped with workstations for the graphic system Model 9 and Model + allows programming and immediately realizing the samples on the machine. Official training on Model are proposed 4 times per year for duration of one week.
